NOTICE OF OPPOSITION

Solar Turbines Incorporated (“Opposer”), a Delaware corporation having its principal place of business at 2200 Pacific Highway, San Diego, California 92161-5376, and a wholly-owned subsidiary of Caterpillar Inc., believes that it is being and will be further damaged by registration of the mark SKF INSIGHT for:

- Bearings as part of machines; machine parts, namely, bearing housings in International Class 7;
- Instruments and equipment for detecting, sensing, measuring, monitoring and controlling of bearings and housings or any industrial rotating machinery as well as computer operating software for the aforesaid goods in International Class 9; and
- Technological consulting and advisory services for detecting, sensing, measuring, monitoring and controlling of bearings and housings or any industrial rotating machinery as well as prediction of maintenance and life prognoses for bearings and housings in International Class 42

¹ Solar Turbines Incorporated is a wholly-owned subsidiary of Caterpillar, Inc., the party that filed the requests for extension of time to oppose Application No. 79138749 on December 17, 2014 and March 26, 2015. Given this relationship, the two entities are in privity with one another and Solar Turbines may bring this opposition. *See F. Jacobson & Sons, Inc. v. Excelled Sheepskin & Leather Coat Co.*, 140 USPQ 281 (TTAB 1963).

by Aktiebolaget SKF (“Applicant” or “SKF”), as shown in U.S. Trademark Application No. 79138749, and hereby opposes the same.

As grounds for opposition, Opposer alleges that, upon actual knowledge with respect to itself and its own acts, and upon information and belief as to Applicant and Applicant’s mark:

Opposer’s INSIGHT SYSTEM and INSIGHT CONNECT Marks

1. Opposer is a Delaware corporation with its principal place of business at 2200 Pacific Highway, San Diego, California 92161-5376.

2. Opposer is one of the world’s leading manufacturers of industrial gas turbines with more than 13,400 turbines delivered to customers in at least 96 countries. It is extensively involved in manufacturing and selling gas turbine packages for the oil and gas and power generation industries. More than ten years ago, Opposer introduced a comprehensive equipment health management software package and servicing solution that is identified by the INSIGHT SYSTEM name and trademark. It was designed to optimize the performance of its power generating and energy producing rotating machinery in the field. The INSIGHT SYSTEM products and services enable remote monitoring, diagnostic testing, alert generation, and troubleshooting turbomachinery and related parts, including its gas turbine engines, compressors, generators, pumps and other rotating machinery. The INSIGHT SYSTEM includes vibration monitoring, as well as a combustion monitoring capability.

3. Opposer’s INSIGHT SYSTEM products and services enable Opposer’s support personnel and its customers to obtain, view and analyze data remotely for operating machinery in the field. Using the INSIGHT SYSTEM products and services, technicians can determine from a remote location if equipment is approaching control limits or if the equipment is operating abnormally. This diagnostic package and servicing system also generates a wide range of reports

automatically to assist in making maintenance, repair or overhaul decisions. These reports include real-time information and analysis of various operational considerations, such as combustion, vibration, fuel system, lube oil, and overall operating performance. The reports, which may include real-time graphical imaging, are automatically processed and posted over the Internet, so that the customer is able to collaborate with designated support personnel to prevent equipment damage and downtime.

4. Opposer's INSIGHT SYSTEM products and services can be adapted to accommodate new equipment and monitoring devices added to a plant or offshore platform, thus integrating the additional data to existing monitoring functions. Further, the INSIGHT SYSTEM enables system operators to monitor a single system at one location or to monitor numerous operating parameters across a networked management system for several locations.

5. The effectiveness of the INSIGHT SYSTEM program is the result of a connectivity solution, known as INSIGHT CONNECT, which standardizes data acquisition and transmission. The INSIGHT SYSTEM program and INSIGHT CONNECT access solution are known to Solar's customers worldwide as Solar's program for managing the operation of its machinery, optimizing equipment health and reliability, and ensuring operator safety.

6. Opposer owns a valid and subsisting federal trademark registration (Registration No. 3221624) for the INSIGHT SYSTEM mark for goods and services in International Classes 9, 16, 37 and 42 as set forth below:

International Class 9

Unit and fleet machinery maintenance management system comprised of computer hardware and software for remote monitoring, diagnostics, generating alerts and troubleshooting of gas turbine driven pumps, compressors and generator packages.

International Class 16

Operations and maintenance manuals related to gas turbine drive[n] pumps, compressors and generator packages.

International Class 37

Providing information in the nature of predictive maintenance recommendations for gas turbine drive[n] pumps, compressors and generators packages; maintenance and troubleshooting in the nature of repair of gas turbine driven pumps, compressors and generator packages and associated ancillary equipment.

International Class 42

Providing temporary use of online non-downloadable collaborative software for creating a virtual technical workspace for remote monitoring, diagnostics, generating alerts and troubleshooting of unit or fleet gas turbine driven pumps, compressors and generator packages; remote monitoring services in nature of real-time analysis and notification of the condition, operating parameters, of specification of gas turbine drive[n] pumps, compressors and generator packages; providing remote monitoring, diagnostics, and alerts regarding gas turbine driven pumps, compressors and generator packages and associated ancillary equipment.

Opposer's INSIGHT SYSTEM mark was registered on March 27, 2007. The registration is for the word mark and, therefore, it is not limited to any stylization, font or design. The date of first use for each good and service set forth in the registration is March 15, 2005. Copies of the TSDR and Assignment records for Registration No. 3221624 are included in Exhibit A.

7. Opposer's Registration No. 3221624 for INSIGHT SYSTEM is based on U.S. Trademark Application Serial No. 78/714,439, which was filed on September 16, 2005, long before the October 3, 2013 filing date of Application No. 79138749, which is based on Section 66(a) of the Madrid Protocol.

8. Further, a combined Section 8 and Section 15 affidavit has been accepted for Opposer's Registration No. 3221624, making the registration incontestable. As such, Opposer's Registration No. 3221624 is conclusive evidence of the validity of the INSIGHT SYSTEM mark, and of Opposer's ownership of and exclusive right to use the INSIGHT SYSTEM mark in commerce. It also provides constructive notice of ownership of the mark by Opposer.

9. Opposer also owns a valid and subsisting federal trademark registration (Registration No. 4145542) for the INSIGHT CONNECT mark for services in International Classes 37 and 42 as set forth below:

International Class 37

Maintenance of gas turbines, gas compressors, internal combustion engines, power generation equipment, power packages, and associated ancillary equipment.

International Class 42

Providing remote monitoring, diagnostics, alerts, remote management of information technology systems of others, and data collection, regarding the operation and condition of gas turbines, gas compressors, internal combustion engines, power generation equipment, power packages, and associated ancillary equipment; computer services, namely, remote management of information technology computer hardware, software, and system access relating to the operation of gas turbines, gas compressors, internal combustion engines, power generation equipment, power packages, and associated ancillary equipment.

Opposer's INSIGHT CONNECT mark was registered on May 22, 2012. The registration is for the word mark and, therefore, it is not limited to any stylization, font or design. The date of first use for each service set forth in the registration is March 2009. Copies of the TSDR and Assignment records for Registration No. 4145542 are included in Exhibit B.

10. Opposer's Registration No. 4145542 for INSIGHT CONNECT is based on U.S. Trademark Application Serial No. 85/354,205, which was filed on June 23, 2011.

11. Opposer has continuously and extensively used the INSIGHT CONNECT mark in commerce in connection with the sale and advertising of the goods and services set forth in Registration No. 4145542 and identified in Paragraph 9 above since at least as early as March 2009. Further, as previously noted, the filing date for Opposer's INSIGHT CONNECT application (June 23, 2011), which matured into Registration No. 4145542 on May 22, 2012, is prior to Applicant's filing date of October 3, 2013, which is Applicant's constructive date of first use. In view of the foregoing, Opposer has priority based on its prior use and its earlier filing date, which precede the filing date of Applicant's SKF INSIGHT application and any date of first use that may be alleged by Applicant.

12. The goods and services identified in Paragraphs 2-11 are collectively referred to as Opposer's Goods and Services.

13. Opposer has enjoyed substantial sales and has spent vast sums in advertising and promoting Opposer's Goods and Services in connection with its INSIGHT SYSTEM and INSIGHT CONNECT names and marks throughout the United States.

14. Opposer's parent corporation, Caterpillar Inc., is one of the world's largest manufacturers of engines. Indeed, Caterpillar engines have been drilling the majority of the world's oil and gas wells for years.

15. Opposer's INSIGHT SYSTEM and INSIGHT CONNECT marks have achieved such widespread public recognition as to become commercially strong in connection with a wide range of industrial equipment and related products and services.

Applicant's SKF INSIGHT Application

16. Applicant Aktiebolaget SKF is a Swedish corporation with an office at SE-415 50 Göteborg, Sweden.

17. Applicant is the listed owner of Application No. 79138749 for the mark SKF INSIGHT for:

- Bearings as part of machines; machine parts, namely, bearing housings in International Class 7;
- Instruments and equipment for detecting, sensing, measuring, monitoring and controlling of bearings and housings or any industrial rotating machinery as well as computer operating software for the aforesaid goods in International Class 9; and
- Technological consulting and advisory services for detecting, sensing, measuring, monitoring and controlling of bearings and housings or any industrial rotating machinery as well as prediction of maintenance and life prognoses for bearings and housings in International Class 42.

18. Applicant's mark consists of standard characters without any claim to any particular font, style size or color.

Likelihood of Confusion, 15 U.S.C. § 1052(d)

19. Opposer repeats and re-alleges each and every allegation set forth in Paragraphs 1 through 18.

20. Since prior to the filing date of Application No. 79138749, and any date of first use that may be alleged by the Applicant, Opposer has used the INSIGHT SYSTEM name and mark in commerce in the United States in connection with the advertising, promotion, and sale of Opposer's Products and Services.

21. Opposer's pleaded INSIGHT SYSTEM registration issued long before the filing date of Application No. 79138749 or any date of first use that may be alleged by Applicant. Opposer's pleaded INSIGHT CONNECT registration is based on an application that was filed prior to Applicant's October 3, 2013 filing date or any date of first use that may be alleged by Applicant. Accordingly, Opposer's rights in its INSIGHT SYSTEM and INSIGHT CONNECT marks predate any rights that Applicant owns in its SKF INSIGHT mark.

22. The goods identified in Application No. 79138749 for the SKF INSIGHT mark are closely related, if not identical, to Opposer's Products and Services.

23. Applicant's SKF INSIGHT mark so resembles Opposer's previously used and registered INSIGHT SYSTEM and INSIGHT CONNECT marks as to be likely, when applied to the identified goods and services, to cause confusion, or to cause mistake, or to deceive under Section 2(d) of the Lanham Act, as amended, 15 U.S.C. § 1052(d).

WHEREFORE, for the foregoing reasons, Opposer is being and will be damaged by registration of Application No. 79138749 for the mark SKF INSIGHT for the identified goods.

Opposer respectfully requests that registration of the mark SKF INSIGHT as shown in Application No. 79138749 be refused and that this Opposition be sustained in favor of Opposer.

A filing fee of \$300 has been submitted electronically. If the filing fee is found to be insufficient for any reason, please charge the deficiency to Deposit Account No. 06-0916.

Respectfully Submitted,

CATERPILLAR INC.
